Advanced Java project: Quiz Manager

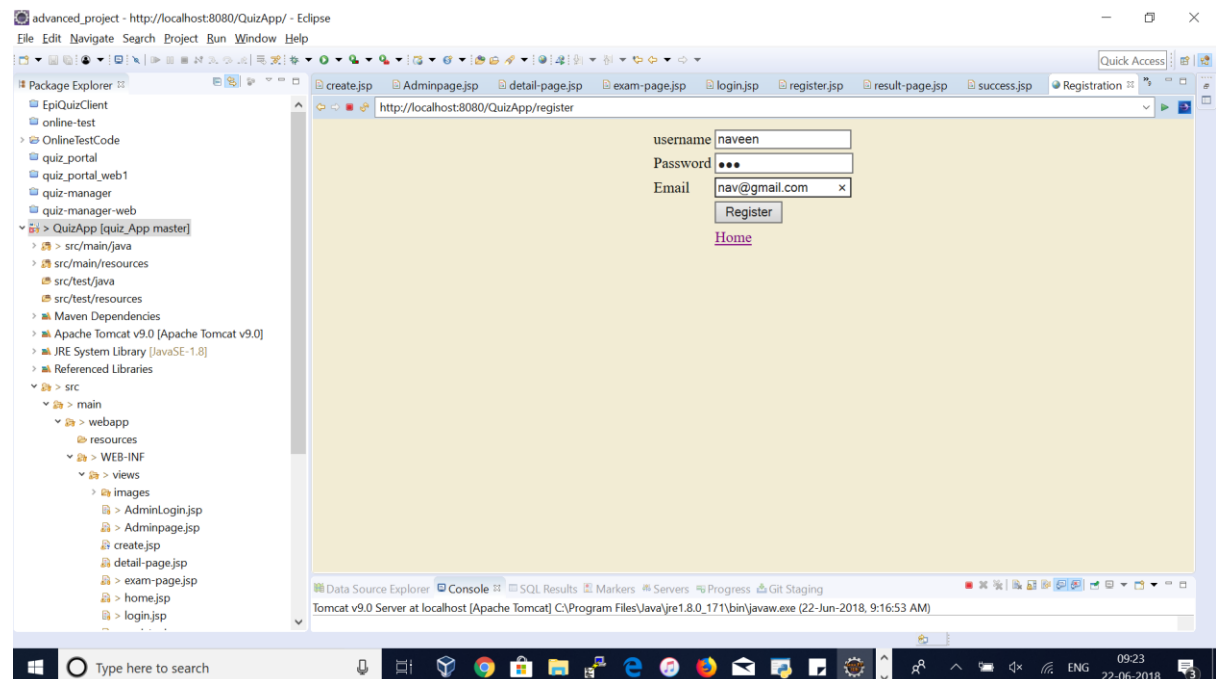

Roshnee Meena

Sushant Attada
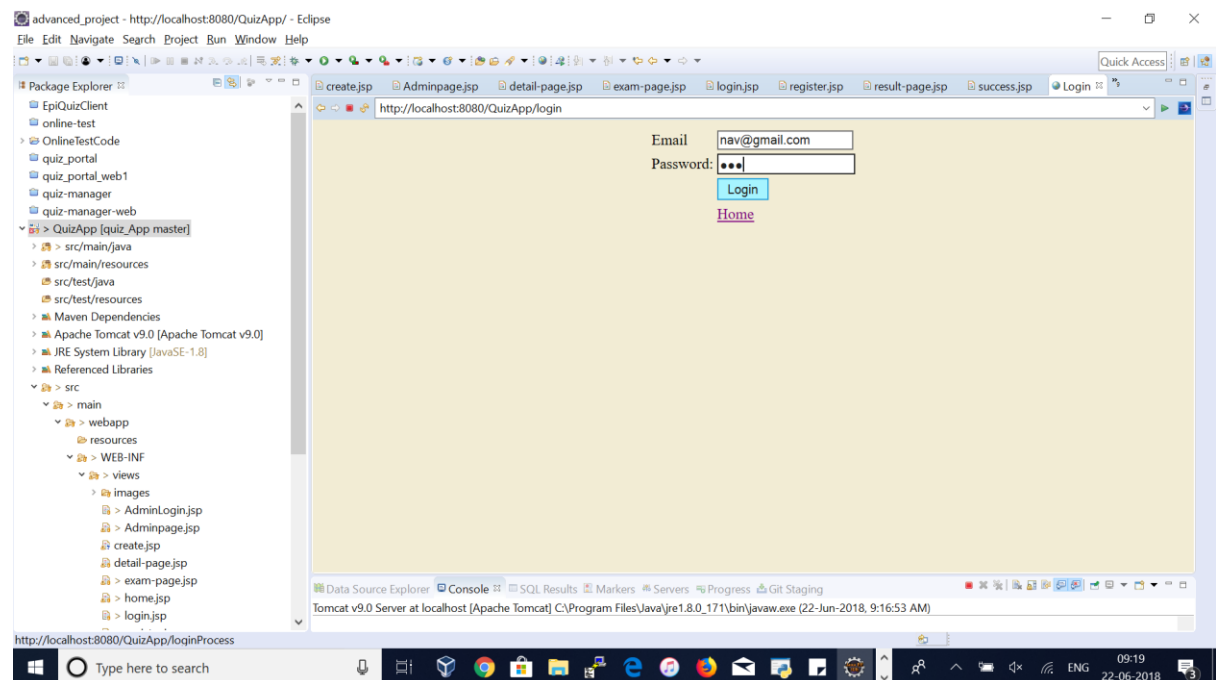

1. This **project** is a brief overview of a Quiz application developed in Spring 3 MVC framework of java. To develop this application, we incorporated the Spring 3 MVC with Hibernate 3.

2. This is the login / register screen where the student and admin can login.

3. Register screen for student. Here the student is registering with name, password and email fields.

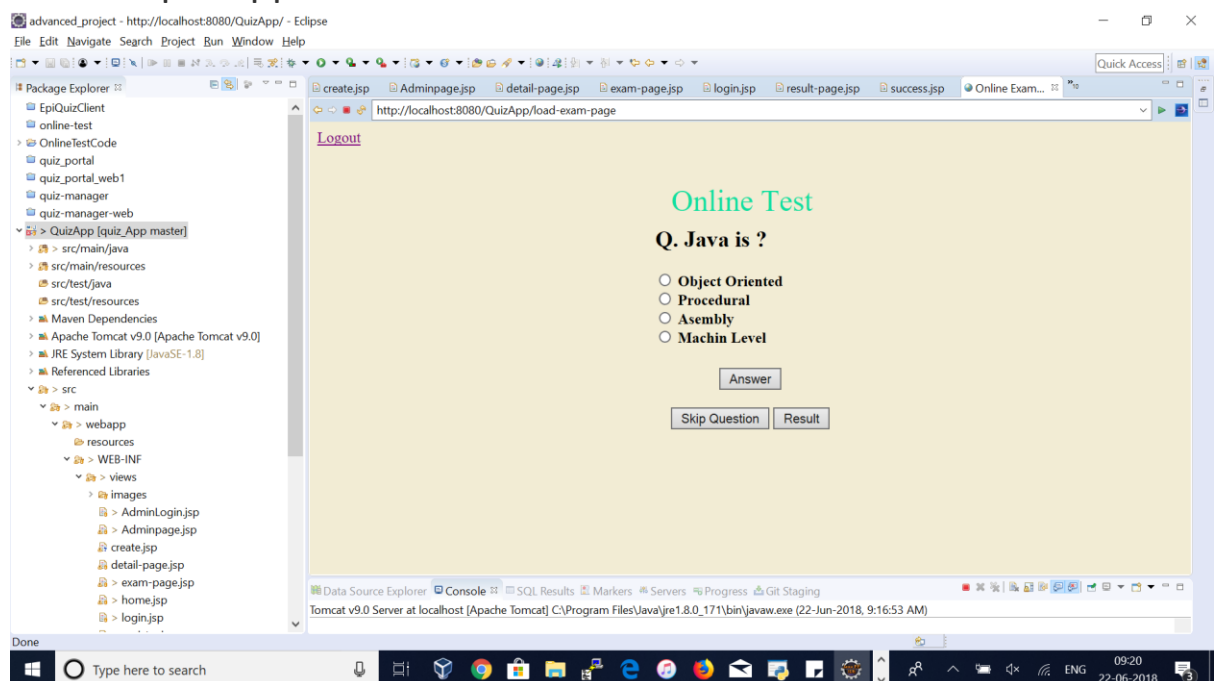

4. Login screen after registering the student. Here the student needs to login again after successful registration.
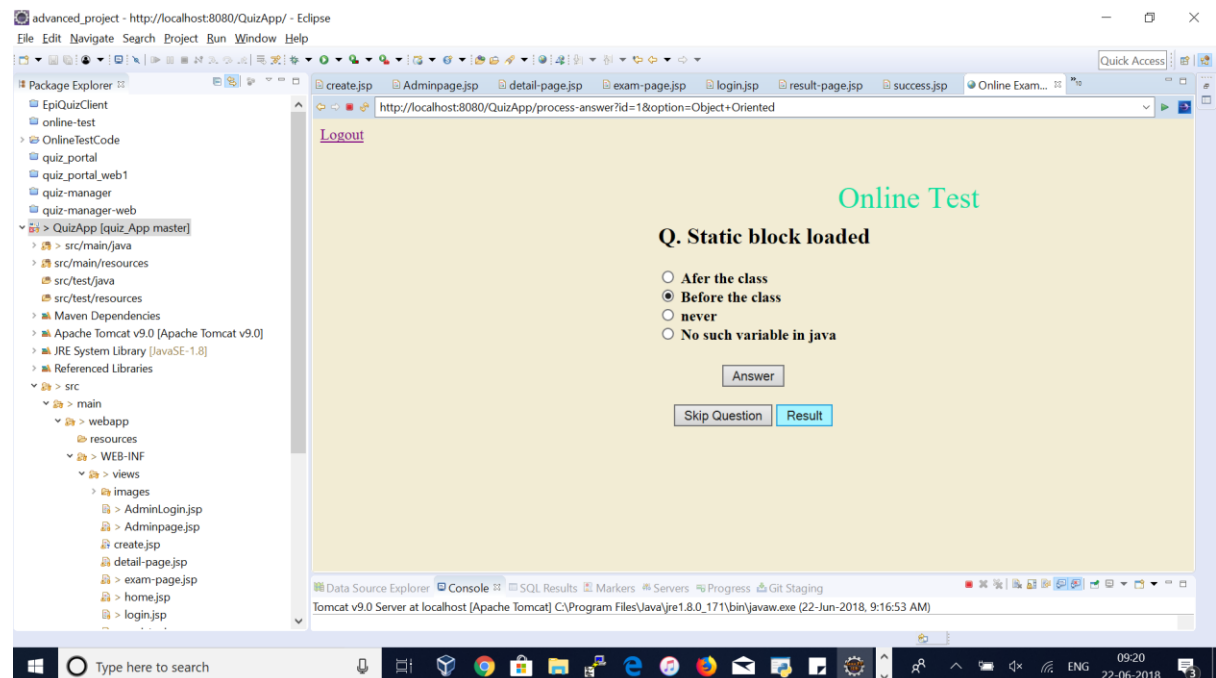

5. Home page after successful login.

6. Start of quiz application: Question 1

7. Start of quiz application: Question 2

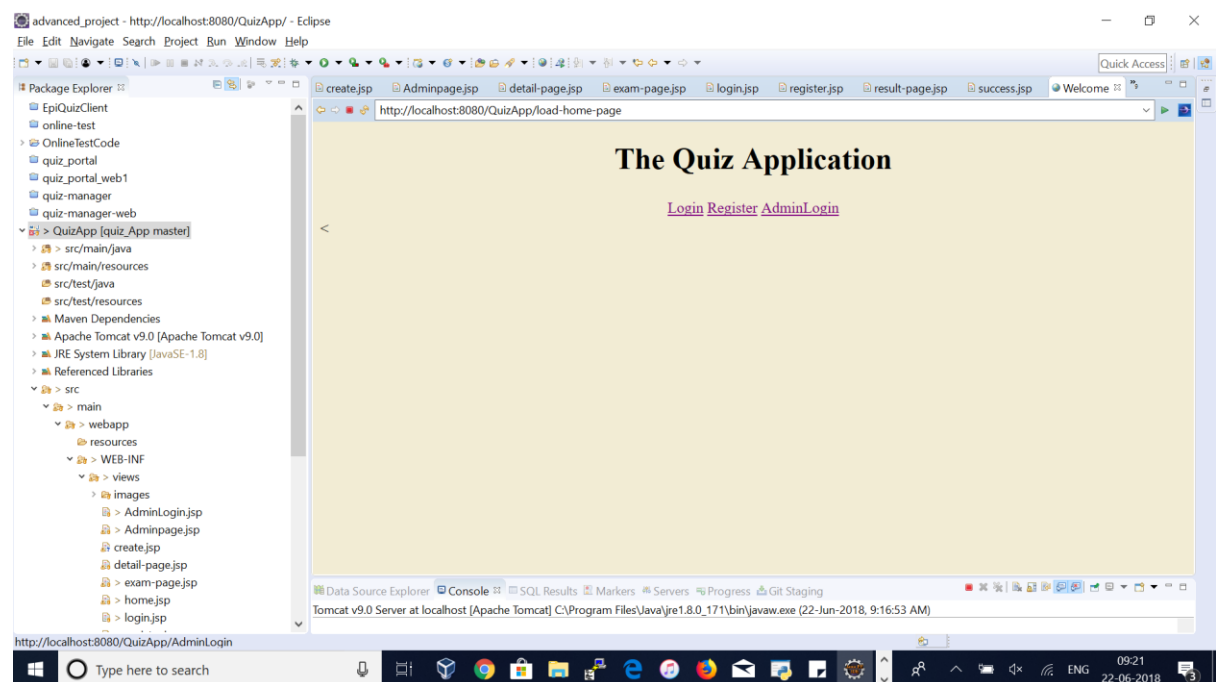

## 8. Start of quiz application: Question 3

9. Result screen. Here we can observe the total marks obtained by the student after the test.

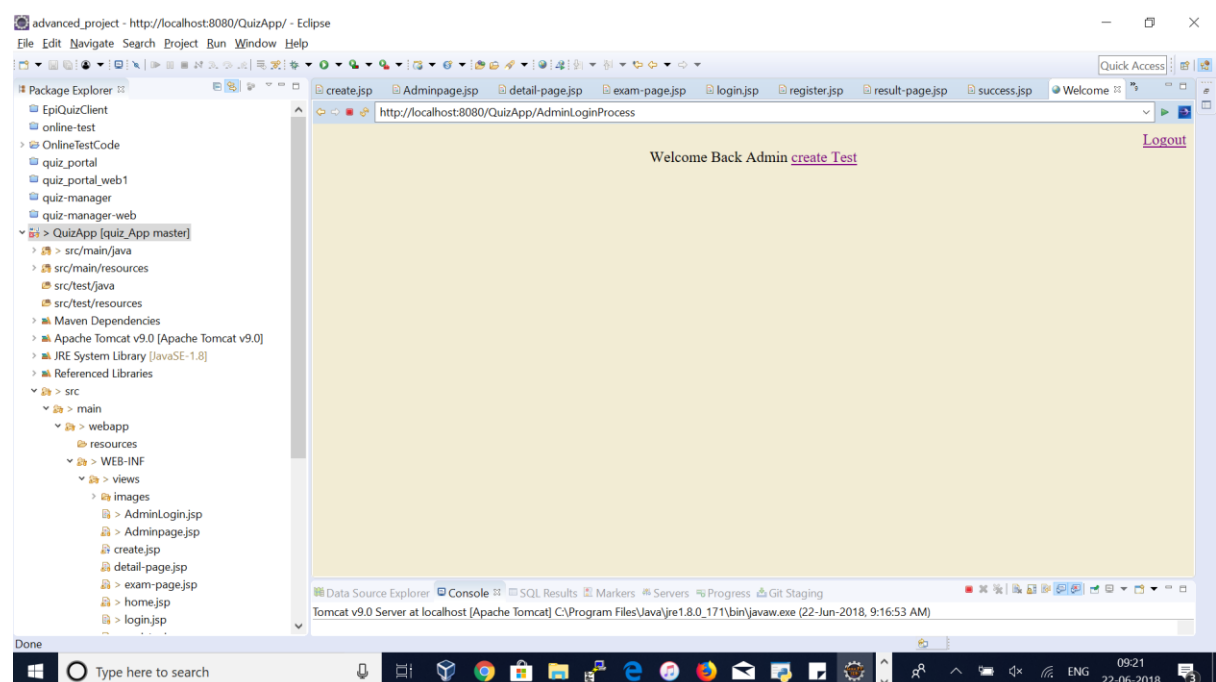

10.   This screen takes back to the login/register screen after completion of the test.

11.   Now you can see the admin login, where you can perform the CRUD operations.

12.   Welcome screen for the admin page. Here you can create test.

13.   Add question screen with options.
